GROUP  
*Formulating a Greener World*

## RETORTABLE & MICROWAVEABLE FILMS

Mylan Group offers the co-extruded plecopak™ High Barrier Films for food and pharmaceutical packaging. EVOH (ethylene-vinyl alcohol copolymer) material provides outstanding gas barrier properties while retaining good process ability. The excellent gas properties of EVOH keep oxygen out and retain nitrogen and carbon dioxide used in Modified Atmosphere Packaging (MAP) technology.

### PP/Tie/EVOH/Tie/PP

|                       |   |
|-----------------------|---|
| <b>Thickness (µm)</b> | 400, 450, 500, 600, 700, 800, 1000, 1200  |
| <b>Properties</b>     | <ul style="list-style-type: none"> <li>• Suitable for temperatures between 5°C and 125°C</li> <li>• Applicable in retort &amp; microwave heating</li> <li>• High resistance to oil and organic solvent</li> </ul>   |
| <b>Applications</b>   | Thermoforming packaging as tray, cup, dish, bowl, blister tray for: <ul style="list-style-type: none"> <li>• Ready to eat food: cooked meals, processed food...</li> <li>• Ready to cook: fresh meat, poultry, seafood, fish, beef...</li> <li>• Pharmaceutical products such as tablets and capsules...</li> </ul> |

### PET/Tie/EVOH/Tie/PET

|                       |   |
|-----------------------|---|
| <b>Thickness (µm)</b> | 350, 400, 500, 600, 700   |
| <b>Properties</b>     | <ul style="list-style-type: none"> <li>• Strong dilute acids, gases, oils and alcohols barrier</li> <li>• Suitable for temperatures between -40°C and 76°C</li> <li>• High gloss and excellent clarity</li> <li>• Resistant against oil and fat</li> </ul>  |
| <b>Applications</b>   | Thermoforming packaging as tray, cup, dish, bowl, blister tray for: <ul style="list-style-type: none"> <li>• Ready to eat food: cooked meals, processed food...</li> <li>• Ready to cook: fresh meat, poultry, seafood, fish, beef...</li> <li>• Pharmaceutical products such as tablets and capsules...</li> </ul> |

Mylan Group offers the laminated plecopak™ transparent high gas barrier film for retort-able and microwaveable food packaging. The film is the ideal alternative to foil as a gas barrier material for retort pouches and lidding. The coating layers are extremely durable and are an outstanding oxygen barrier before and after retort. It is suitable for Modified Atmosphere Packaging (MAP) application.

### BOPET//Ceramic/PA/Ceramic//RCPP

|                       |   |
|-----------------------|---|
| <b>Thickness (µm)</b> | 80 - 105  |
| <b>Properties</b>     | <ul style="list-style-type: none"> <li>• Performance independent of the retort method</li> <li>• Low gas, aroma and water vapor permeability</li> <li>• High resistance to oil and organic solvent</li> <li>• Retort temperature up to 135°C (60 min), 120°C (120 min)</li> <li>• Suitable for microwave heating</li> <li>• Excellent printability and sealants</li> </ul>                    |
| <b>Applications</b>   | Stand up/ flat/ vacuum pouches for: <ul style="list-style-type: none"> <li>• Ready-to-eat food: cooked meals, processed food...</li> <li>• Ready to cook: fresh meat, poultry, seafood ...</li> <li>• Non-food product: health care product, consumer goods...</li> </ul> Lidding film for : <ul style="list-style-type: none"> <li>• Ready meal trays</li> <li>• Ready cook trays</li> </ul> |
